

MyJio Telemetry Analytics Platform

Management Analytics Report

This report summarizes telemetry-derived customer engagement, campaign exposure, interaction behaviour, and analytics insights generated from the configurable telemetry analytics framework.

The report is generated automatically from telemetry data using the analytics pipeline.

June 2026

1. Dataset Summary

Measure	Value
Customers	1
Events	194
Campaigns	4
Sessions	5

2. Customer Analytics Summary

Customer 1015289504

Key metrics

Metric	Value
Impressions	7
Clicks	3
Skips	3
CTR	42.9%
Sessions	5
Campaigns reached	4
Exposure frequency (per session)	1.40
Interaction frequency (per session)	1.20
Campaign diversity (0-1)	0.12

Key scores

Score	Value
Engagement score (0-1)	0.289
Exploration score (0-1)	0.261
Campaign receptiveness score (0-1)	0.353

3. Campaign Analytics Summary

Campaigns: 4

Campaign reach (distinct customers reached per campaign)

Campaign	Customers reached
200PlanFloater_forGeminien_US	1
5000GB_GetJioHomeen_US	1
PLANEXPIRY01	1
iActivate_Fiber usersen_US	1

Campaign interaction: per-campaign interaction is not produced at campaign grain in the current pipeline. Customer-grain interaction frequency averages **1.20** interaction(s) per session across the dataset (see §4).

4. Top Metrics

Dataset averages (equal to the single customer's values when the population is one).

Metric	Value
Click-through rate (CTR)	42.9%
Campaign diversity (0-1)	0.12
Exposure frequency (impressions/session)	1.40
Interaction frequency (per session)	1.20

5. Top Insights

Customer 1015289504

- **Engagement with floaters** — Of 7 floaters shown, the customer clicked 3 (43% CTR) and skipped 3 (43% skip rate) — an even click/skip split.
- **Campaign reach & diversity** — Reached by 4 distinct campaign(s); exposure is concentrated on a few campaigns (diversity 0.12).
- **Exposure vs interaction** — Across 5 session(s), the customer saw ~1.4 floater(s) per session and acted on ~1.2; more floaters were shown than were acted on.
- **Session activity** — Logged 194 events across 5 session(s), averaging 39 per session.
- **Clicks after repeat exposure** — On average a campaign was shown ~2.0 time(s) before its first click.

6. Analytics Observations

Customer 1015289504 — at a glance

- 43% CTR with an even click/skip split across 7 floaters.
- Reached 4 campaign(s); exposure concentrated on a few campaigns.
- ~1.4 floaters/session over 5 session(s); more floaters were shown than were acted on.
- First click came after ~2.0 exposure(s) of a campaign.

Data sufficiency: this run validates platform capability rather than business performance. Population benchmarking needs multiple customers, campaign comparison needs multiple campaigns, segmentation needs a larger population, and conversion analytics need conversion events. Figures here are illustrative of the pipeline, not a representative business read.
